

# Jetmaster INSET STOVES

LOOK AT THE FIRE

# 16i

HIGH EFFICIENCY

3.6 kW output

85% efficient

Defra approved

Wood & multi-fuel

Fits 16×22×14" opening

No air supply required\*

★ *Low output, perfect for new builds and our most efficient stove ever!*

# 18i

HIGH EFFICIENCY

4.9 kW output

85% efficient

Defra approved

Wood & multi-fuel

Fits 18×22×14" opening

No air supply required\*

★ *The most efficient 18" inset stove in the UK (HETAS Guide 2015).*

## FEATURES

### Made in the UK

All our stoves are made in Britain and built to rigorous quality standards. Carefully crafted in Cornwall, England, we use high-grade British steel and carefully seam weld each joint to ensure a stronger, more durable product that you can trust.

### Defra approved

The 16i, 18i, 50i and 60i are approved by Defra to burn wood in smoke control zones. Burning wood on our stoves is one of the most environmentally friendly methods of heating, which can save your home over 180 kgs of carbon production annually.

### Convective heat

Jetmaster inset stoves warm the room in two ways: directly, with heat radiating off the glass and through convection, where cool air is drawn around the firebox and gently pushed back in to the room as hot air.

### Wood or multi-fuel

Choose the fuel that's right for you – coal, briquettes or smokeless fuels – the top row of stoves (16i, 18i, 50i, 60i) all burn multi-fuel beautifully, right out of the box. And the large 70i will burn multi-fuel with our drop-in basket grate.<sup>o</sup>

## PureBurn Technology

Jetmaster's PureBurn Technology keeps the stove burning at the highest efficiencies. Combustion air is superheated through the unit, then reintroduced back in to the main chamber, igniting unburnt carbon particulates during a secondary combustion. This results in increased efficiency and fewer harmful emissions in the atmosphere. The science works.

## MORE FEATURES

- Five year guarantee<sup>‡</sup>
- Removable handle
- Wide or standard frame

## 50i

HIGH EFFICIENCY

6.3 kW output      Wood & multi-fuel  
84% efficient      547×593×355 mm opening  
Defra approved<sup>s</sup>

★ *Clean line design and a beautiful flame picture.*

## 60i

HIGH EFFICIENCY

7.5 kW output      Wood & multi-fuel  
84% efficient      647×593×355 mm opening  
Defra approved

★ *The UK's most efficient mid-sized inset stove (HETAS Guide 2015).*

### ACCESSORIES

## External air kit

All Jetmaster inset stoves have the option of drawing external air directly in to the stove. This eliminates the requirement to install an air supply in the room, which brings cold air in from the outside, often creating a chill. Our kit feeds external air directly in to the stove.

## Handles

Our sturdy wooden handle comes as standard. The new precision engineered metal handle is also now available for all our stoves.

## Ducting kit

Hot air generated around the convector box can be piped into other rooms in your home. A ducting system can redirect a third of the heat away from the room, so that a larger fire with a bigger flame picture can be enjoyed without that room becoming a furnace.

## 60i Low

WIDE VIEW

6.5 kW output  
78% efficient  
Wood burning only  
647×493×355 mm opening

★ *Wide view of the fire. Designed to fit low lintel openings.*

## 70i

HIGH OUTPUT

10 kW output

77% efficient

Wood & multi-fuel ready<sup>0</sup>

747×593×355 mm opening

★ *Our largest window, roaring heat and a truly wide fuel bed.*

## 70i Low

PANORAMIC VIEW

8.5 kW output

73% efficient

Wood burning only

747×493×355 mm opening

★ *Our widest panoramic view of the flames. Fits low lintel openings.*

## SIX GREAT REASONS WHY YOU'LL LOVE YOUR JETMASTER WOOD BURNER

Since 1951, Jetmaster have brought the ambiance and romance of real fires into over a million homes. There's nothing quite like the simplicity and welcoming warmth of a Jetmaster. Here's why...

### 1. Look at the fire

We use distinctively large windows that feature the whole fire, so the roaring heat of your wood burner is seen as well as felt.

### 2. Built in Britain

All our stoves are British-made, designed for British homes.

### 3. Not just wood

Burn the fuel that's best for you. Most of our inset stoves burn multi-fuel right away.<sup>0</sup>

### 4. PureBurn Technology

Our highly optimised cleanburn system ensures your stove burns at the most efficient rate.

### 5. Built with quality

Jetmaster have an established reputation for long-lasting quality. That's why we offer a five year guarantee on our work.<sup>‡</sup>

### 6. Powerful airwash

Our airwash system uses an extra thick air curtain forced between the fuel bed and window to keep the glass cleaner for longer than a conventional stove. Enjoy the full flame picture with a Jetmaster inset stove.
