ELECTRIC FIRES

GAZCO
Fire Your Imagination

free your imagination

Undulating flame visuals, dancing seemingly impossibly amongst a deep bed of realistic logs or shining crystals, make the Skope one of the most captivating electric fires ever created.

But the Skope doesn't just deliver mesmerising effects and a fireside glow. Designed with the very latest LED technologies and offering a choice of stunning fuel beds, this innovative electric fire range lets you decide on the perfect ambience to suit your mood - with only your imagination to hold you back.

GAZCO
Fire Your Imagination

choosing your skope...

skope inset for a hole in the wall fire

Pages 12-21

Skope Inset fires are offered in four sizes and are designed to be built into the wall for a minimalist installation that integrates seamlessly with your interior.

skope outset for a multi-sided fire

Pages 22-27

Skope Outset fires allow you to create a bespoke two sided or three sided installation, for a unique focal point that provides a panoramic view of the stunning visuals.

trento suite for skope outset fires

Pages 28-31

The stylish Trento Suite is available for both sizes of the Outset Skope, offering an easily installable, hang on the wall fire that can be selected in a number of two or three sided configurations.

inspiring flames and fuel effects

Conjuring dramatic flame effects, sparkling embers and an enchanting ambience, the Skope's ground breaking lighting systems effortlessly create the magic of a real fire... and much more.

immersive lighting system

Skope fires use Gazco's Chromalight triple lighting system to create a mesmerising display with almost endless possibilities.

Vivid flame effects are projected to appear amongst the fuel bed for a deep, three-dimensional display and can be set to natural amber, striking blue or even a combination of the two.

Each flame colour is enhanced with matching down-lighting, which bathes the fuel bed in either warming amber or cool white for a truly immersive display.

Powerful Chromalight up-lighting illuminates the fuel effects from below, providing relaxing, mood-enhancing ambience whether set to amber, for an authentic

glowing ember bed, or one the 13 other atmospheric colour choices. Fuel bed lighting can also transition through each vivid colour for a gradually changing spectrum that provides the ultimate wow factor.

- 1 Choice of three flame effects
- 2 Immersive down lighting
- 3 A selection of 13 vivid fuel bed colours

customisable fuel bed

Every Skope fire comes with a varied selection of fuel effects that transform the fire's look and feel. The highly realistic log selection (pictured left) offers a traditional wood fire aesthetic, and when positioned on the bed of clear and grey pebbles looks just like a real fire.

Alternatively, the Crystal-Ice effect fuel bed (pictured right) creates an ultra-contemporary

vibe, particularly when paired with the blue flame setting and the many vibrant Chromalight up-lighting colour options.

Whichever fuel bed you choose, the fire's easily removable glass front allows you to quickly mix and match any of the assortment of effects you wish, for your own bespoke display.

finalist for best heating product

Shortlisted for the esteemed BuildIt award for Best Heating Product, the Skope has wowed judges with its contemporary aesthetics and breath-taking visuals.

creative control

The Skope's advanced thermostatic handset gives you full control over the fire's host of features. Flames, fuel bed lighting and ambient heating can all be controlled independently to create the desired atmosphere, with or without heat.

Innovative energy saving features let you 'set and forget' the Skope to turn heating on or off automatically, as well as intelligently manage the heat output to minimise energy use, allowing you to completely immerse yourself in the visual effects.

complete creative control

flame options

Select Amber, Blue or Amber & Blue flames to suit your mood, with five brightness settings for each colour to give you the perfect ambience.

chromalight fuel bed lighting

Choose from 13 different vibrant colours to illuminate the Skope's striking fuel bed, which can be fine-tuned with five brightness levels.

Alternatively, you can opt for a gradually changing spectrum as the fuel bed lighting cycles through each colour.

thermostatic ambient heating

Select the optimum room temperature you desire and your Skope does the rest for you. Choose between 15°C and 25°C degrees, and depending on the ambient temperature the Skope will reach the desired level as efficiently as possible.

comfort temperature

Comfort Temperature lets you set the thermostat as you would your central heating, with Eco and Boost settings, which offer further freedom to adjust the temperature by +/- 4°C if desired.

heating advance mode

You can manually advance any pre-set heating cycle to either come on or turn off before the programmed time without disrupting daily or weekly scheduling.

adaptive start control

Adaptive Start allows the Skope to automatically turn on up to 45 minutes in advance of a pre-set time to reach your desired temperature when you want.

daily and weekly heating

Set the Skope to turn on to provide heat at certain times of the day, or even days of the week, using the handset's Daily and Weekly Timer control functions.

open window detection

A sudden drop of temperature of 4°C or more within five minutes, like that caused by an open window, will automatically turn off the Skope's heat to save energy. Heating can easily be resumed simply by pressing the heat button, or allowing the room's temperature to rise by closing the window.

The Skope's innovative energy saving features make it compliant with stringent 2018 Ecodesign energy product standards.

the gazco pedigree

When you choose Gazco, quality and technology are assured. From contemporary hang on the wall fires to traditional stoves, Gazco are committed to creating the ultimate in flame effect fires. Our research and development laboratories are amongst the most advanced in the industry, ensuring that the very latest innovations are incorporated into our products.

Gazco is part of the Stovax Group who offer a prestigious product range, which includes everything from the traditional to the ultra-contemporary in a wide array of styles and sizes. Whether your choice is solid fuel, gas, or electric you can be sure to find a stove or fireplace from our range to add the perfect warmth and character to your home. Full details of the Stovax Group's range of products can be found at www.stovax.com.

Gazco is an ISO9001 accredited company. Our rigorous quality control system ensures that all our appliances comply with British Safety Standards as well as stringent European regulations. All fires in this brochure are CE marked. This means they have been independently tested to exacting European standards.

warranty information

Your Gazco retailer will provide you with a Two Year Warranty for your new electric fire providing it is registered with Gazco. Please note this warranty excludes certain consumable parts. Fires purchased outside of Gazco's Expert Retailer Network will carry a standard One Year Non-Extendable Warranty. Full warranty details, terms and conditions are available at www.gazco.com.

expert retailer network

We take great care to ensure that our fires are designed, tested and manufactured to the highest possible quality and safety standards. We are just as concerned to make certain that they are sold and installed correctly so that you will enjoy years of pleasure from your purchase.

Accordingly, you will find our products are only available from experienced, independent retailers who will be happy to show you a selection of models locally in their showrooms, often fully operational. These independent retailers will discuss your individual requirements covering both technical issues and design, to ensure that you select the most appropriate product for your home. They will also be able to advise on, or assist with, the installation process as well as help provide any after-sales support and servicing your appliance may require in the future.

Whilst we encourage our retailers to promote fireplace products and their outlets via the internet, we do not believe suitable levels of customer care and satisfaction can be obtained from purchasing the product only online and we would strongly recommend that you consider this when undertaking your research and making a purchasing decision. Furthermore, please be aware that we do not offer technical support (beyond our statutory responsibilities) to products bought via nationwide online sales, where this support would normally be offered by one of our qualified, independent retailers.

In addition, Gazco fires purchased from within our Expert Retailer Network will have the additional benefit of an extended warranty period, subject to terms and conditions. Full details can be found at www.gazco.com.

experience the skope

To truly experience the Skope's realistic flame and enchanting lighting effects, view our short showcase video by scanning the QR code with your mobile device or visiting www.gazco.com/skope. Alternatively, you can visit your local expert retailer to see the Skope first-hand!

skope inset fires

Skope Inset fires create minimalist, hole-in-the-wall installations for a clean and contemporary, built-in aesthetic. Offered in a choice of four sizes from the smallest 85R to the commanding 195R, Inset models are suitable for a broad range of settings from the lounge to the bedroom. Each size features the Skope's powerful Chromalight Immersive LED technology, assortment of feature fuel effects, and advanced Thermostatic handset.

trento suites

for skope outset fires

Creating a designer Skope installation can be as easy as simply hanging your fire on the wall with the range of Trento Suites. Each Trento Suite features clean and stylish floating shelves for a statement finish that completely houses your fire.

Available for both the Outset 70W and 110W fires, the Trento is offered in various configurations (shown overleaf) to suit your interior, allowing you to install your Skope Outset as either a centrally positioned three-sided fire or asymmetrically positioned two-sided corner fire.

Skope 110W Right Offset with Log & Pebble fuel effects, Decorative Column and End Cap

trento suites

as stylish as they are
easy to install

Both 70W and 110W Skope Outset fires can be installed as three-sided or two-sided corner fires. For two-sided corner installations, the Trento Left Offset and Trento Right Offset Suites can be positioned with the flush end against the corner of the room, as shown on page 30.

For perfect symmetry, the Trento Central offers a balanced style that positions the fire in the middle of the Suite. Alternatively, the Left and Right Offset Trento options provide a strikingly asymmetric installation. Depending on your choice of installation, contrasting black Decorative Columns and End Caps can be added to complete your Skope Trento and heighten appeal.

trento configuration options

- 1 - Trento Centred Suite for three-sided central fire
- 2 - Trento Centred Suite with Decorative Columns for three-sided central fire
- 3 - Trento Right Offset Suite for two-sided right corner
- 4 - Trento Right Offset Suite with Decorative Column for two-sided right corner
- 5 - Trento Left Offset Suite for two-sided left corner
- 6 - Trento Left Offset Suite with Decorative Column for two-sided left corner
- 7 - Trento Right Offset Suite with Decorative Column and End Cap for two-sided off-centre
- 8 - Trento Left Offset Suite with Decorative Column and End Cap for two-sided off-centre
