A NATURAL WARMTH

*Traditional and Contemporary
Wood and Multi-fuel Stoves*

A Natural Warmth

The Yeoman Range...

From its humble origins over 30 years ago on a farm near Dartmoor, renowned for its cold winters, Yeoman has grown to become one of the UK's leading stove manufacturers. Today, we offer not only a wide selection of traditionally-styled woodburning, multi-fuel, gas and electric stoves, but also high-output boiler stoves through to contemporary stoves, with each model providing superb value for money.

Contents

Traditional Wood & Multi-Fuel Stoves..... 6 - 13

A comprehensive collection of classically designed stoves, incorporating the unmistakable atmosphere of a real log or smokeless fuelled fire. From the compact Exmoor model to the grander County, that true rural ambiance can be perfectly attained in rooms of all sizes.

CL Wood & Multi-Fuel Stoves..... 14 - 27

For those with a more contemporary taste, the eye-catching CL range with clean geometric designs, brings woodburning and multi-fuel stoves right into the heart of 21st century living.

Traditional & CL High-Output Boiler Stoves 28 - 33

Complete home heating never looked so good. The latest additions to the Yeoman range, these five exceptionally efficient stoves not only heat the room they are in, but can also provide enough hot water to supply up to 19 radiators throughout the rest of the house. Traditional & Contemporary styles with freestanding and inset models.

Double-Sided Stoves 34 - 35

Truly the ultimate centre-piece, these exquisite stoves bring two rooms together with your choice of three timeless designs.

Gas and Electric Stoves and Fires

Yeoman's range of gas and electric stoves and fire are available in a separate brochure or can be viewed online at www.yeomanstoves.co.uk, please see pages 42-43 for more information.

Woodburning & Multi-fuel Stoves & Fires

County woodburning with high canopy

Wood & Multi-fuel Stoves

All Yeoman stoves are designed to burn wood and smokeless fuels and have been independently tested to exacting standards for both heating efficiency and emissions. The Exmoor, Exe, Devon, CL3, CL5, CL7 & CL Milner models are also approved for the burning of wood in Smoke Control areas when fitted with a smoke control kit, details can be found on the relevant product pages.

Wood – Wood is the better fuel in environmental terms being carbon neutral, as the amount of carbon dioxide released into the atmosphere is approximately the same as that absorbed by the tree during growth. It is also a renewable resource, particularly when derived from plantations and cultivated woodland. For optimum results, we recommend logs should be seasoned for 2 years or more to achieve a moisture content below 20%. This will not only give a higher output than of freshly felled timber but help avoid a build up of tar in your flue. Furthermore, if you can obtain hardwood logs this is better still, as they will have a greatly increased calorific value of softwoods for the same volume.

Solid fuels – anthracite and manufactured smokeless fuels can be burnt on multi-fuel stoves or woodburning models with the addition of a multi-fuel kit. Multi-fuel stoves have a riddling grate which allows ash to be riddled into a built-in ashpan to create the optimum conditions for efficient combustion. Please note, however, that petroleum based fuels must never be used on your stove.

Boiler Stoves

Several Yeoman Woodburning/Multi-fuel stoves are designed to be fitted with optional boiler systems and details of these can be found on appropriate pages. Additionally, Yeoman offer a selection of High-Output Boiler models that come with the boiler built in. Please see pages 28-33 for details.

Your Yeoman, Your Way...

Styling options

The look of your stove is very important. That is why Yeoman offers you the opportunity to personalise your stove with a variety of styling options. According to model, these include flat top and high or low canopies, panoramic single doors, double doors with removable window crosses, brass handles and plain or Tudor Rose air spinners.

**Information for boiler options is a guide only. Seek advice and a site survey from a qualified heating engineer before ordering.*

***All stoves shown with this symbol boast the advantage of not normally requiring an air vent^Δ where the air permeability is greater than 5.0m³/hr/m². Ventilation normally required is 550mm². Please discuss in full with your local retailer. ^ΔRequirements in the Republic of Ireland are different.*

Colour options

Colour is another option, with a choice of 4 paint finishes available for most stoves: Matt Black, Metallic Blue, Metallic Brown or Metallic Green. CL Stoves are finished in Metallic Black[†].

Yeoman Extended Warranty

Your Yeoman Expert Retailer will provide you with a Two Year Warranty for your new solid fuel stove. This can then be extended to a Five Year Warranty provided it is registered with Yeoman. Please note, these warranties exclude certain consumable parts. Stoves purchased outside of Yeoman's Expert Retailer Network will carry a standard One Year Non-Extendable Warranty. Full warranty terms & conditions are available to view at www.yeomanstoves.co.uk.

Expert Retailer Network

To help you select the right stove for your home, you will find our useful reference symbols throughout the brochure. However, your Yeoman retailer will be pleased to provide any further information and advice you may require. We take great care to ensure that our stoves & fires are designed, tested and manufactured to the highest possible quality and safety standards. We are just as concerned to make certain that they are sold and installed correctly so that you enjoy years of pleasure from your purchase.

Accordingly, you will find our products are only available from experienced, independent retailers who will enable you to see a selection of models locally in their showrooms, often fully operational. These independent retailers will discuss your individual requirements both technical (such as sizing the heat output to your room and advising on your flue type) and design, and ensure that you select the most appropriate product for your home.

They will also be able to advise on or assist with the installation process as well as help provide any after sales support and servicing your appliance may require in the future. Whilst we encourage our retailers to promote fireplace products and their outlets via the internet, we do not believe suitable levels of customer care and satisfaction can be obtained from nationwide online sales and we would strongly recommend that you consider this when undertaking your research and making a purchasing decision. Further, please be aware that we do not offer technical support (beyond our statutory responsibilities) to products bought via nationwide online sales, where this support would normally be offered by one of our qualified, independent retailers.

Furthermore, Yeoman fires and stoves purchased from within our Expert Retailer Network will have the additional benefit of a greatly extended warranty period, subject to terms and conditions. Full details can be found at www.yeomanstoves.co.uk.

Exmoor multi-fuel with flat top

Exmoor - neat and compact for the smaller room

Exmoor

Wood and Multi-fuel Stoves

Particularly suited to smaller rooms, the classically styled Exmoor is designed to fit neatly into a traditional 'builder's opening'. The gently curved front and sides give this model a solid, well proportioned appearance and one which can enhance both traditional and contemporary settings. A curved glass window also provides an excellent view of the flames.

Exe - ultimate versatility with optional boiler

Exe

Wood and Multi-fuel Stoves

Compact yet versatile, the Exe offers you an extensive choice of styling options as well as an optional boiler that can provide domestic hot water. It features Yeoman's Clean Burn system too, so you will enjoy improved fuel efficiency and a greater control of combustion. Furthermore, being a nominal 4.9kW output, no air vent^Δ is needed when the Exe is installed.

Devon multi-fuel double door with flat top

Devon - at home in both traditional and modern settings

Devon

Wood and Multi-fuel Stoves

The Devon is a highly popular, medium sized stove which can be tailored to look equally at home in the fireplace of a modern house or the inglenook of a country cottage. It also offers an impressive heat output of up to 9kW whether burning logs, anthracite or smokeless fuels.

County

Wood and Multi-fuel Stoves

The largest of our traditional stoves, the County has the proportions to grace any inglenook and the performance to provide a magnificent focal point in larger rooms and open living spaces. The vast firebox is designed to accept logs up to 460mm (18”) long, so that you do not need to load fuel so often. It also has the potential to produce considerable heat output.

CL3

Multi-fuel Stove

Designed to be equally at home in either a traditional setting or today's more modern interiors, Yeoman's woodburning and multi-fuel CL range of stoves are an eye-catching focal point. Furthermore, the CL range offers the very latest in heating technology creating high efficiency and trend setting aesthetics. The smallest in the series, the CL3, makes a big impression despite its compact proportions. To complement the gentle curves of the stove front, there is a decorative cast top plate supplied with each of the CL stoves.

CL3 multi-fuel

CL5 woodburning

CL5 - high efficiency heating and 'modern traditional' styling

CL5

Wood and Multi-fuel Stoves

With high efficiency and 'modern traditional' styling, the CL5 offers a fresh alternative for heating in today's homes. Along with the smaller CL3, the CL5 is approved for use in Smoke Control zones, so you can achieve carbon neutral heating with wood wherever your location! It is available in two versions: woodburning only or multi-fuel which incorporates a riddling grate to allow the burning of smokeless fuels. In addition, both versions are enhanced by the decorative cast top which provides subtle elegance with its minimal curved form.

CL5 Midline

Multi-fuel Stove

One of the latest additions to the Yeoman range, the new CL5 Midline has been designed with an integrated log store and like all CL Stoves features a subtly curving cast iron top plate. Available as a multi-fuel model only, the Midline features the same advanced Airwash and Cleanburn technology as the CL5 whilst providing an impressive 5kW heat output. The Midline offers a real style statement whilst providing a functional space-saving option for your home.

CL Milner

Multi-fuel Inset Fire

The CL Milner has been designed with high performance and ease of installation in mind. The CL Milner has the ability to be installed into a 16" - 18" wide and 20" - 22" high fireplace without the need to remove the Milner Brick; meaning that it can be easily secured and sealed into an existing chimney without the requirement for any building work making it cheaper to install. There is also no need for a flue liner, therefore if your chimney is in good condition and has been swept it can generally be fitted in under an hour!

CL Milner Design Features

- 1 5mm heavy duty steel construction
- 2 Easy fit
- 3 Specifically designed for 16" and 18" Milner brick openings
- 4 High performance firebox lining to enhance combustion process
- 5 Cast iron air-tight door with primary air control lever
- 6 Yeoman Airwash System – to give a clearer view of the flames
- 7 Clean Burn - the secondary air system provides greater fuel efficiency (Wood: 76%, Smokeless fuels: 81%)
- 8 Stainless steel handle with self locking function
- 9 Contemporary screen printed ceramic glass
- 10 Top flue exit only – 152mm (6")
- 11 Adjustable secondary air control
- 12 Smoke Control Area Approved* (not illustrated)

High-Output Boilers

Woodburning & Multi-fuel Boiler Stoves

Five models within the range have been specifically designed to supply your domestic hot water and central heating requirements or augment your existing heating system via 'link up' technology. Whichever your choice, you will enjoy all the atmosphere of a real fire and exceptional heating performance for other areas of your home.

When providing hot water and central heating, each stove is capable of feeding an average 8000BTU hotwater cylinder and from 8 up to 19 radiators. The exact number of radiators will depend upon how many rooms you wish to heat and sizes of those rooms. Radiators also come in a variety of sizes/capacities but, for example, a typical 400mm high x 1000mm wide, single panel radiator requires 2500BTU/hr. You should always consult a qualified heating engineer to ensure the stove can meet your requirements.

Alternatively, you can 'link up' a Yeoman High-Output Boiler with your existing or proposed heating system to reduce your reliance on gas or oil and help decrease overall heating fuel costs. There are ways to link with conventional oil or gas central heating, gas or oil sealed heating systems, combi boilers, underfloor heating and even solar panels to provide flexible and cost-effective solutions. Yeoman produces a 'link up' guide showing typical arrangements and covering some frequently asked questions. You may find it useful to download this from

www.yeomanstoves.co.uk/linkup before discussing your requirements with a qualified heating engineer.

All Yeoman High-Output Boiler stoves are designed for multi-fuel use and incorporate an externally operated riddling grate. This is because solid mineral fuels tend to provide greater calorific values. Should you wish to reduce your CO₂ emissions then you can also burn a combination of smokeless fuels and logs together. However, if woodburning only is your preference, you can still achieve good performance but, as logs burn best with slightly different firebox characteristics, we recommend you purchase the optional log tray which replaces the riddling system on multi-fuel models or the new dedicated woodburning only models for the County 60HB and 80HB.

		 Nominal Heat Output			
Devon 50HB	✓	13.0kW(WB) 14.0kW (MF)	70% (WB) 72% (MF)	10.0kW 34,000BTU	9 ^Δ

Exe Double-Sided - the warming heart of your home

Double-Sided

Wood and Multi-fuel Stoves

There can be few sights as inviting or reassuringly evocative, especially on a cold winter's night, as the roaring fire of a Yeoman double-sided stove turning two rooms into the warming heart of your home. With a Yeoman Double you enjoy twice the stove. Doors front and back are designed to open into adjoining rooms with one central chimney. You can choose from Exe, Devon and County models and from single or double depth versions. Each model also has a number of styling options to complement your decor.

- Top flue - 153mm (6")
- Suitable for burning wood or multi-fuel[#]
- Yeoman Airwash System – to give a clearer view of the flames
- Optional spark guards^{*}
- Single or double door options (depending on model)
- Tudor rose or plain air spinners[◇]
- Removable Tudor Rose door crosses^{*}
- Single or double depth versions (depending on model)
- Optional brass handles

^{*} Double door - Devon & Exe only. County has crosses, but no spark guard

[◇] Single door only

[#] With the use of a multi-fuel kit (except County Double Depth which is woodburning only)

	Depth	Doors				 Wood [†]	 Wood	 MF kit [†]	 MF kit
Exe	Double	1 or 2	✓	×	×	11.0kW	69%	8.0kW	79%

Care of your Stove or Fireplace

Yeoman is a member of the Stovax Group which manufactures and distributes many other high quality fireplace, stove care and accessory products, as well as solid fuel, gas and electric fires and stoves. To help maximise the enjoyment from your stove or fireplace and keep it in good condition, inside and out please ask your Yeoman retailer for a Stovax accessories brochure or view the complete range online at www.stovax.com.

Contemporary Steel Log Holders and Tool Sets

For more modern interiors, Stovax has developed a range of contemporary log holders and stove tool sets crafted in matt black steel and stainless steel. These are highly attractive and a superb pairing to Yeoman's range of CL stoves and fires in particular.

Professional XQ™ Chimney Systems

The Stovax Group also offer a comprehensive range of stove & fireplace chimney systems, the Stovax Professional XQ™ collection. Crafted from 304L grade stainless steel for a durable outer finish, the fully sealed components offer water tight protection for the insulation within. With innovative decorative options, the ability to specify a colour for your system and with a host of technical advancements such as their Twist-Lock system, the

Professional XQ™ range provides an attractive, versatile and reliable solution for your flue system. Furthermore, the Professional XQ™ range carries a 10 year conditional warranty offering complete peace of mind. For further information, please speak to your retailer or visit www.stovax.com/chimneysystems.

Technical Information

Product Improvement, Photography and Safety Information

Yeoman pursue a policy of constant product improvement. Products supplied may therefore differ in specification from those illustrated or described in this brochure, and you should always check the final specification with your Yeoman retailer.

All fire and flame photography has been taken from genuine products; however, the exact appearance of the flame picture for any appliance will vary depending on the nature of the flue type, installation surroundings, local geographical features and the way in which the appliance is operated.

Please note that all parts of these stoves and fires, particularly the glass panel in the door, become extremely hot during operation and can result in serious injury and burns if touched. It is therefore recommended that a fireguard complying with BS 8423:2002 is used in the presence of young children, the elderly or infirm. Furthermore, by law all installations also require a Carbon Monoxide monitor be present.

Extended Warranty

Your Yeoman Expert Retailer will provide you with a Two Year Warranty for your new solid fuel stove. This can then be extended to a Five Year Warranty provided it is registered with Yeoman. Please note, this warranty excludes certain consumable parts and are dependant on your appliance being serviced by an appropriately qualified person 12 months after installation and annually thereafter. Stoves purchased outside of Yeoman's Expert Retailer Network will carry a standard One Year Non-Extendable Warranty. Full warranty terms and conditions are available to view at www.yeomanstoves.co.uk.

Installing Your Yeoman Stove

In the UK, a HETAS approved installer should undertake a site survey prior to purchase and must install your Yeoman Stove for you. Your Yeoman Expert Retailer will be able to offer you advice on this. You may also view or download installation instructions at our website. All fires and stoves consume air as they burn. To comply with UK Building Regulations (Document J), therefore, if you are purchasing a stove with a maximum heat output in excess of 5.0kW, you will need to install a fixed air vent to ensure adequate ventilation. Outputs below this will not normally require a vent.

Yeoman Heat Shields

Yeoman has introduced a range of highly effective Heat Shields for the following stoves; Exmoor, Exe, CL3, CL5, CL5 Midline and CL5 Highline. These fantastic additions allow a reduction in the distance to combustible materials at the rear and sides of the stoves as shown below. The Yeoman Heat Shields not only maximise the available space within the room, but they also enable you to accommodate a wider range of materials in your interior design. For further information please speak to your local Yeoman retailer.

Distances to combustible materials when fitted with Yeoman Heat Shield:

Stove	Distance from rear (mm)	Distance from sides (mm)
Exmoor	100	300
Exe	250	450
CL3	200	400
CL5	200	300
CL5 Midline	200	300
CL5 Highline	200	300

Yeoman Gas and Electric Stoves and Fires

Several of the stoves in this brochure are also available as electric or gas versions. Yeoman's highly efficient gas range feature superbly realistic fuel beds and are developed with innovative features such as choice of fire linings and thermostatic remote controls!

Perfect for the hallway, study or conservatory, Yeoman's electric stoves can be simply plugged in and switched on for that 'real fire' look, brought alive with unique VeriFlame™ technology which provides a variable combination of flame speed and glow level. The individually hand-painted 'logs' perfectly mirror the atmosphere and attraction of a real woodburning stove.

Operation is simple too as the stove's remote control not only allows VeriFlame™ selection but also adjustment of the heat combinations. The amount of heat produced can be altered between 1kW and 2kW depending on the warmth required. You can even enjoy the flames without the heat!

For more details, please see the Yeoman Gas & Electric Stoves & Fires brochure or contact your local expert retailer for further information. Alternatively, you can view or download the complete range online by visiting www.yeomanstoves.co.uk or scanning this QR code with your mobile device.
